Product Description :-

The PE apron consists of fluid resistant, multi use plastic material. The upper part has a loop('o'-cut) to hang around the neck and two straps to be tied up around the waist. PE aprons are made of very resilient PE foil, Making these aprons especially resistant to tensile strains. They are equipped with a hang on hole so they can simply be hanged within the entrance area of your production facility. The aprons will not stick together upon removal thanks to their special treatment. this ensure that single aprons are separately removable. our C-Cure PE Aprons are the ideal solution for quick and easily applicable protection that is easily accessible.
